Authorized as Second Class Mail. Post Office Department, Ottawa

VOLUME 35: No. 40

ACME, ALBERTA, THURSDAY

NOVEMBER 8th, 1956

\$1.50 a Year; 5c a Copy

Margaret Hay is now employed at the local telephone office.

Mrs. Jack Hay has returned to Sundre to reside.

Mr. and Mrs. Willard Vanner and family and Mr. Ed Wise have taken up residence at Huxley.

Mr. C. H. Nash returned on Thursday from Stettler where he spent a few days at the home of his daughter Daphne.

**REMEMBRANCE DAY OBSERVANCE AT CARBON**

Owing to the fact that Nov. 11th falls on Sunday and all the clergy concerned have heavy duties, it is not possible to have a separate service in the Hall this year.

The official Legion parade and service will therefore take place at Christ Church (Anglican) Carbon at 3 p.m. Preacher, Rev. W. R. Mueller. Followed by ceremony at War Memorial in the Park.

We had hoped to have Rev. Hutton with us but he is undertaking similar duties at Rockford at the same time.

**LOST or STRAYED**—Black Cow with calf at foot. Brand JM9 left rib.

—Apply W. White, Box 106, Carbon.

**TRADE FOR GRAIN**—1954 Dodge Mayfair Sedan. 3 Ton 1947 Mercury Truck.

—F. A. Goerlitz, phone 503, Acme.

**BLUNTS PRIVATE NURSING HOME**—Efficient nursing care for young and aged—Spotlessly clean—Inspection invited. Registered nurse in charge. Phone 694128 — 1120-6 Ave. S.W., Calgary. Matron formerly Mary Lammle, R.N. of Swalwell.

**FOR SALE**—Holstein Cow to freshen soon. First and second cut Alfalfa.

—R. S. Hagerman, phone 310, Carbon.

Mr. and Mrs. Fred Harsch spent a couple of days in Calgary, Mrs. Harsch's son having left for China.

Several local men went big game hunting last week: C. O. Martin, Walter Schacher, Chuck Goldhamer, Jimmy Barber,

Tom White, Paul Goldhamer.

Terry McCracken is a patient in the Red Cross hospital in Calgary. Sorry we missed you in our recent issues Terry. Now boys and girls, how about sending Terry a card once in a while

Mr. and Mrs. Stan Torrance spent the weekend at the home of their daughter and son-in-law Mr. and Mrs. Cam Kirby of Red Deer. While they were the baby daughter of Mr. and Mrs. Kirby was baptised in the Red Deer Anglican Church.

The organization meeting of Acme Breeding Co-operative Association Limited was held on Saturday night, Nov. 3rd. Mr. Heath of the Dept. of Industries and Labor Co-operative Branch helped fill out the application for charter and addressed the meeting. Officers elected were: President.....Edward Carman Secty.-Manager Ken Greenway Three Year Directors, Pat Brown, Drumheller and Melvin Kindopp, Level Land.

Two Year Directors, Mormon Schmaltz, Beiseker and Ray Hannah of Acme. One Year Directors, Jack Doherty, Acme; Martin Hecktor of Carbon and Edward Carman of Acme.

The first annual meeting is to be held within 60 days of December 31st.

Mr. and Mrs. Fritz from Peace River were visiting with their aunt Mr. and Mrs. Emil Gramms and Grandma McGee.

Down from Canadian Union College for the weekend and for the Lang—Overman wedding were Donald Schabor, Lorne Gramms, Wayne Leiske, Judy Stuelze, Yvonne Stern, Jerry Kindopp, Ann Rutledge, Ruby Haynes.

#### CARD OF THANKS

I wish to thank all who so kindly sent cards, gifts and visited me while I was a patient in the Drumheller hospital.

Jim Bushby.

#### CARD OF THANKS

We wish to thank all those who contributed toward the hostess chairs given to us at the Community Shower. We'd also like to thank those who did the entertaining and also the ladies who served the lunch. Thanks to all the friendly people of Carbon who made the community shower possible.

Keith and Shirley Halstead, Box 235,

Olds, Alta.

#### CARD OF THANKS

We would like to thank the members and adherents who so generously donated food and their time to make the Carbon United Church Fowl Supper a success in spite of the weather.

The net proceeds of \$242.65 have been turned over to the Building Fund of the Carbon United Church.

Thank you,  
Jr. Ladies Aid Convenors.

Mr. and Mrs. G. McMann were visiting at Stettler over the weekend.

Dr. and Mrs. Hervey Gimbel and children Shirley and Denise from Detroit were visiting with their parents Mr. and Mrs. J. Gimbel from Aug. 29 to Sept. 9, then to Seattle, Wash. and to Vancouver, B.C. before returning home. He is taking some special surgical training at Pontiac, Michigan General hospital and University of Michigan and plans to return to practise in Alberta after this period of training.

Here's what  
keeps the price  
of gasoline  
low

Why have wholesale gasoline prices increased only one-third as much as wholesale prices in general since 1935-1939?

Raw material and other costs have gone 'way up.  
Why not gasoline?

Gasoline prices have stayed down because a lot of companies are in the oil business—producing, refining and selling, more and more efficiently.

Competition for the motorist's dollar keeps the price of gasoline low.

## Level Land

A number of the Level Land ladies attended the Dorcas Federation for Southern Alberta on Tuesday, Nov. 6 in the Calgary Central Church. Speaker was Miss Vandermark of the General Conference Welfare Dept. of Washington, D.C. who showed new films of the tornado which presented the humanitarian work in recent disasters.

Mr. and Mrs. Marvin Dick and Mr. and Mrs. Arthur Patzer and

## NOV. 12-17 IS F.U.A. WEEK

The co-operation of Alberta farmers will determine the success of this very important Farmers' Union membership drive. The issue is squarely up to the farmers to take this opportunity to build a strong Farmers' Union.

**U.F.A. Co-op**, organized by farmers to serve farmers in the farm supply field, is keenly interested in the development of a strong Farmers' organization. To get a fair deal for agriculture it is essential to have a farm organization with a membership representing the majority of the Farmers of Alberta.

**U.F.A. Co-op** strongly urges all farmers and particularly its members to take an active part in F.U.A. Week. Join the Farmers' Union of Alberta. Get your neighbors to join.

"WHY A FARMERS' UNION IN ALBERTA"

### Compete for world champion plowman title

Over the clouds to England to right) Robert Timbers, 29, of Stouffville, Ont., and Edwin Demman, 23, of Portage la Prairie, Man., with their team manager, Russell Beilharts of Bruce Station, Ont., former president of the Ontario Plowmen's Association.

### GEMS OF THOUGHT ::

#### GRUMBLING

Grumblers are commonly an idle set. Having no disposition to work themselves, they spend their time in whining and complaining both about their own affairs and those of their neighbors. —M. Henry.

Every one may see daily instances of people who complain from the mere habit of complaining. —Richard Graves.

Just as you are pleased at finding faults, you are displeased at finding perfection. —Johann Kaspar Lavater.

Let thy discontents be thy secrets. —Benjamin Franklin.

Had we not faults of our own, we should take less pleasure in complaining of others. —Francis de S. Fenelon.

### More Comfort Wearing FALSE TEETH

Here is a pleasant way to overcome plate discomfort. FASTTEETH, an improved powder, sprinkled on upper and lower plates holds them firmer so that they feel more comfortable. Not gummy, goopy, pasty or feeling like all sorts (non-acid). Does not sour. Checks "false odor" (denture breath). Get FASTTEETH today at any drug counter.

### BACKACHE Maybe Warning

Backache is often caused by lazy kidney action. When kidneys get out of order, excess acids and wastes remain in the system. Then backache, disturbed rest or that tired-out and heavy-headed feeling may soon follow. That's the time to take Dodd's Kidney Pills. Dodd's stimulate the kidneys to normal action. Then you feel better—sleep better—work better. Get Dodd's Kidney Pills now.

### Discovers Way to Shrink Painful Piles

Here is a nice, clean, easy way to get real relief from the nagging distress of swollen, painful piles without the inconvenience of ointments, pile pipes or suppositories.

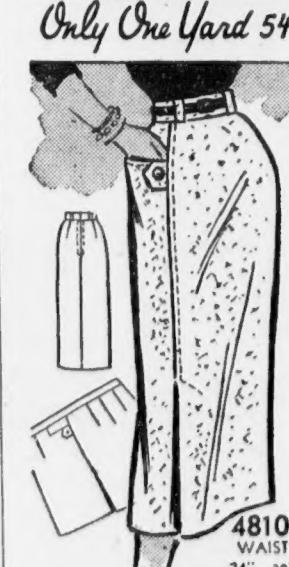

The secret is in taking just one small Hem-Roid Tablet, with water, two or three times a day. Works through effective INTERNAL action. Quickly eases constipation, relieves itching, soreness and pain. Helps shrink piles and permits them to heal.

When suffer needlessly when Hem-Roid offers you so much. Get a package today. See for yourself how nice Hem-Roid is to use, how effective it is and how much more comfort it will quickly bring you. All drug stores. Low cost. Money refunded if you are not 100% pleased.

#### NEW PRINTED PATTERN EASIER-FASTER MORE ACCURATE

#### PRINTED PATTERN

Our new PRINTED PATTERN—beginner-simple to use! Even a sewing novice can make this skirt in little time. Flattering sheath silhouette takes just ONE yard 54-inch fabric! So thrifty—make several for your fall wardrobe!

Printed Pattern 4810: Misses Waists 24, 25, 26, 28, 30 inches. All given sizes: 1 yard 54-inch.

Directions printed on each tissue pattern part. Easy-to-use, accurate, assures perfect fit.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept., Department P.P.L.

60 Front Street W., Toronto. Be sure to write plainly your Name, Address and Pattern Number.

### IN THE HOME WORKSHOP —RUTH WYETH SPEARS

#### For work or play

Carpenters' horses that fold away are a boon to the home workshopper. A top of battened boards turns them into a big table for parties or work. Pattern 372, which shows how to make this setup with stock lumber and hardware, will be mailed for 35c. This pattern is one of five in the packet Quick and Easy Indoor Furniture. Price \$1.50.

### Child's room designs

If you have odds and ends to furnish a child's room, gay painted figures are just the thing to harmonize pieces and give endless pleasure. Pattern 288 offers a wide variety of designs. Just trace the outlines and fill in the colors as indicated. Price of pattern is 35c.

#### FREE CATALOGUE upon request

Address order to:  
Home Workshop Patterns,  
Department P.P.L.,  
4433 West 5th Avenue,  
Vancouver, B.C.

### JUNIOR FIRST AID

When children acquire cuts, burns and scratches, they may continue to play in the dirt unless they are taught that such injuries should be kept free from dust and germs. It is a good idea to teach bigger children the elementary principles of first aid so that they can cleanse and cover these injuries with a dressing. The handy ready-made dressings should be kept available in the home where any member of the family can use them.

#### COURTESY PAYS OFF

### Honors, rewards for dog heroes

Dog lovers and those who admire a hero will be interested in hearing of Penny, a German shepherd from Elmore, Minn., who is a runner-up for the title of the most heroic dog of 1956. Penny drove off a 547-pound boar that attacked her master, Tom Dahl, Jr., when he went to feed his hogs. The boar suddenly attacked Dahl, knocked him to the ground. Penny jumped over a high fence, pounced on the back of the animal that was repeatedly attacking the now prone farmer, and forced the boar to another side of the yard... A \$1,000 bond, a gold-plated leash and collar, a gold plaque, a dog blanket and a year's supply of dog food await Penny. (Let's hope Penny likes dog food and that she will enjoy a trip to Chicago to receive the reward.) Something tells me Penny would be happier home on the farm at Elmore.

There are four other competitors, a sheep dog who brought help to an injured boy, a mongrel who rescued a child lost in a woods, a mixbreed who saved a boy trapped in a swamp and a retriever who attacked a rattlesnake ready to strike a child. Second, third, fourth and fifth-place winners get bonds of smaller denominations and silver collars, medals and six months supply of dog feed.

—Christian Science Monitor.

### TRY AND STOP ME!

By BENNETT CERF

From Indianapolis comes the story of a little Mexican boy named Jose who attended his first ball game late in the season at the Yankee stadium in New York. Later, he reported delightedly to his mother, "Not only do they give me free ticket, free soda, and free hot dog, but before game she start, whole crowd stand up and shout, 'Jose, can you see?'"

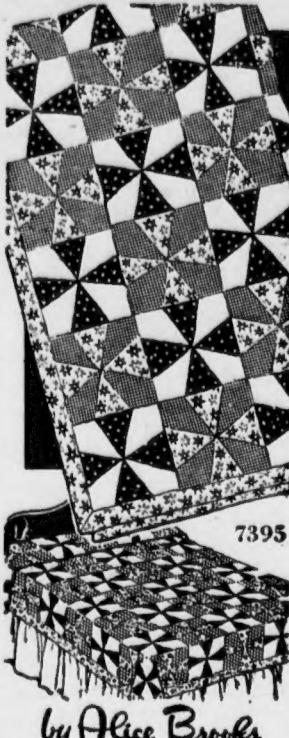

Mr. Murray heard a next-door neighbor fumbling at his door for many minutes, and finally got up to see if he could help. He found the fumbler, obviously high and almost apoplectic with rage. Murray said, "No wonder you can't get in that way, old man. You're trying to insert a cigar into the keyhole!" The neighbor's jaw dropped. "How do you like that?" he demanded. "I must have smoked my key!"

#### TWO AIDS IN LIFE

There are two things to aim at in life: first, to get what you want; and, after that, to enjoy it. Only the wisest of mankind achieves the second.

### Fashions

#### Quilt 'square dance'

Just two patches, four different fabrics make this smart quilt "Square Dance". It's a colorful new design for your home now—future heirloom for your children!

Pattern 7395: Charts, directions, pattern for two-patch quilt. Yards/ages for single, double-bed sizes.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,  
Department P.P.L.,  
60 Front Street W., Toronto.

Two FREE patterns—printed in our ALICE BROOKS Needlecraft book—stunning designs for yourself, for your home—just for you, our readers! Dozens of other designs to order—all easy, fascinating hand-work! Send 25 cents for your copy of this wonderful book right away!

#### Criminal acts

Criminal acts on the highways are killing many more people than criminal acts off the highway, but we will never have enough police officers to detect and apprehend every driver who commits a hazardous traffic violation. It is up to motorists themselves to promote this voluntary observance of traffic laws and the rules of safe driving.

Jane Ashley Says

### "Corn Starch Makes Tastier Entrées"

#### BEEF PATTIES WITH ONION SAUCE

1/4 cup MAZOLA Salad Oil  
3 cups peeled, sliced onions  
2 bouillon cubes  
2 cups boiling water  
2 tablespoons BENSON'S or CANADA  
Corn Starch

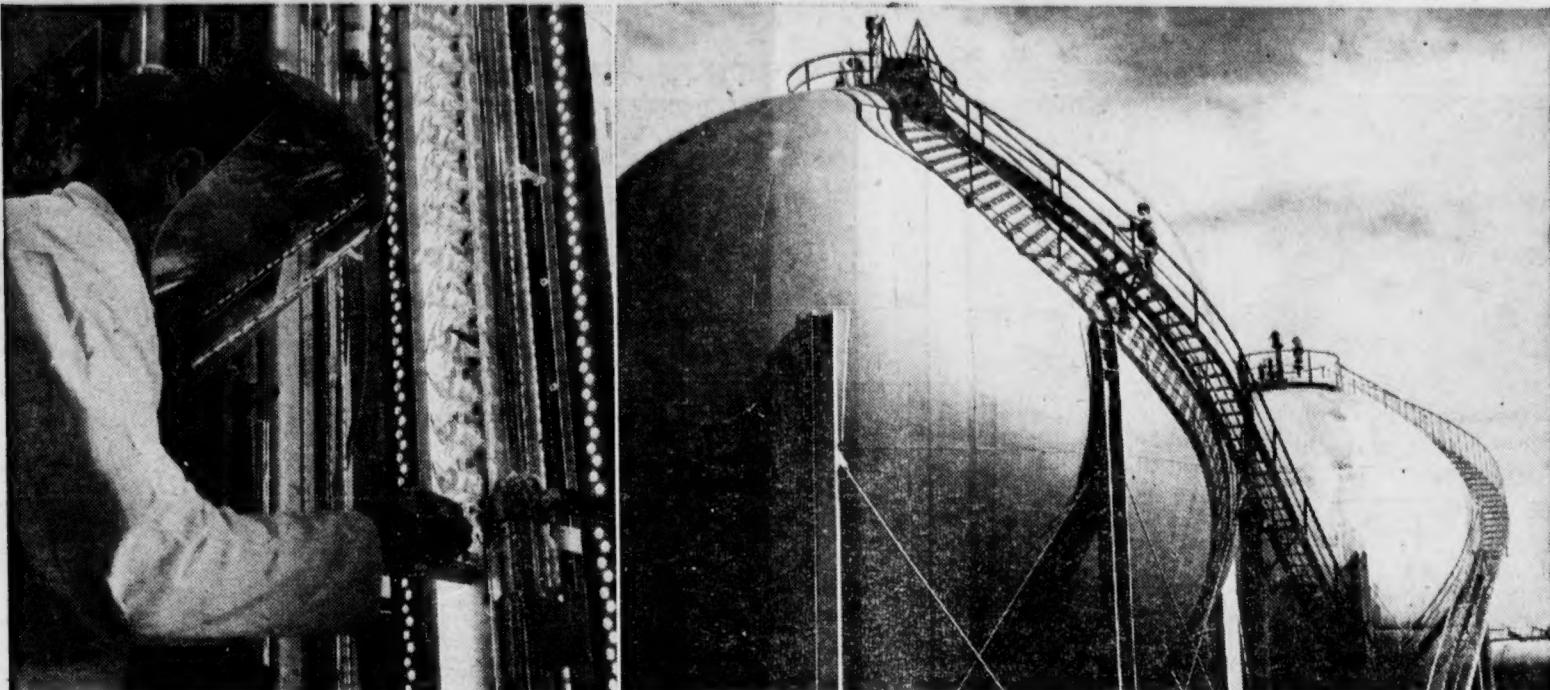

1/4 cup cold water  
1/2 teaspoon salt  
1/8 teaspoon pepper  
1 pound minced beef  
3/4 teaspoon salt  
1/8 teaspoon pepper

HEAT MAZOLA in deep frying pan. ADD onions; cook over medium heat until deep brown, stirring well. DISSOLVE bouillon cubes in boiling water; add slowly to browned onions. MIX BENSON'S or CANADA Corn Starch with cold water; stir into onion mixture. COOK until clear and thick, stirring constantly. ADD salt and pepper; cover and keep hot. COMBINE minced beef, salt and pepper. SHAPE into six thick patties; pan fry or broil. ARRANGE on platter; pour sauce over patties and serve immediately. YIELD: 6 servings.

# Canada Seventh as Oil Producer

Constant research maintains high quality and further improves the processing of oil products. The operator of this automatic electronic analyzer for low temperature distillation is wearing a safety mask for protection.

Oil consumption has tripled since 1946 when the domestic supply was only about a million barrels. The 1955 output of over 128 million barrels now meets the needs of all of Western Canada and part of Ontario and production has increased by almost 40% in the first half of 1956.

The search for oil goes on by helicopter, horseback, canoe, and on foot. Exploration and development in Alberta alone cost \$340,000,000 in 1955 but we now rank seventh as world crude oil producer although only accounting for 2.3% of world production.

National Film Board of Canada Photos.

Eureka! Black Gold! Many a well is dug without results. When one does produce, the joy of the crew is unmeasurable. This driller's oil-splattered face graphically portrays his elation as he watches the oil come in.

## Accidents in the home exceed highway accidents

"Surprising as it may seem to some, home accidents involving Saskatchewan people, continue to exceed highway and farm accidents in Saskatchewan," Hon. J. Walter Erb, minister of public health, reported. He said it was pleasing to find, however, that there was a 19 percent decrease in all kinds of accidental fatalities during the first six months of this year as compared with the corresponding period in 1955.

Fatal home accidents showed a decrease of 27 percent, farm fatalities dropped by 40 percent, and motor vehicle accidents were down 36 percent. The Department of Public Health keeps tally only of accidents happening to Saskatchewan residents, wherever they are. The Highway Traffic Board totes up all motor vehicle and traffic deaths, including visitors as well as residents of the province.

Accidental deaths totalled 157 up to June 30, Mr. Erb said, quoting figures gathered by the department's Health Education Division. Fifty-five persons were killed as a result of home accidents, 33 in farm accidents, and 25 in motor vehicle and traffic mishaps.

A number of Government agencies are making an intensive effort to reduce various kinds of accidents, with the Department of

Public Health concentrating on home and farm accidents.

"It may be that all this educational effort is paying off at last, Mr. Erb said, but it is too soon to tell. I think, too, that if the work is not kept up and even intensified, apparent gains can quickly be lost. The figures for the first half of this year are gratifying, but the goal is to be able to report a year-by-year decrease.

"Accidents cause grief and pain and they are also expensive. Everyone pays the financial cost of accidents in a province such as ours where we do so much co-operatively. The whole province will benefit, for instance, if we are able to reduce the large number of people now requiring hospital care for accident injuries. 3217

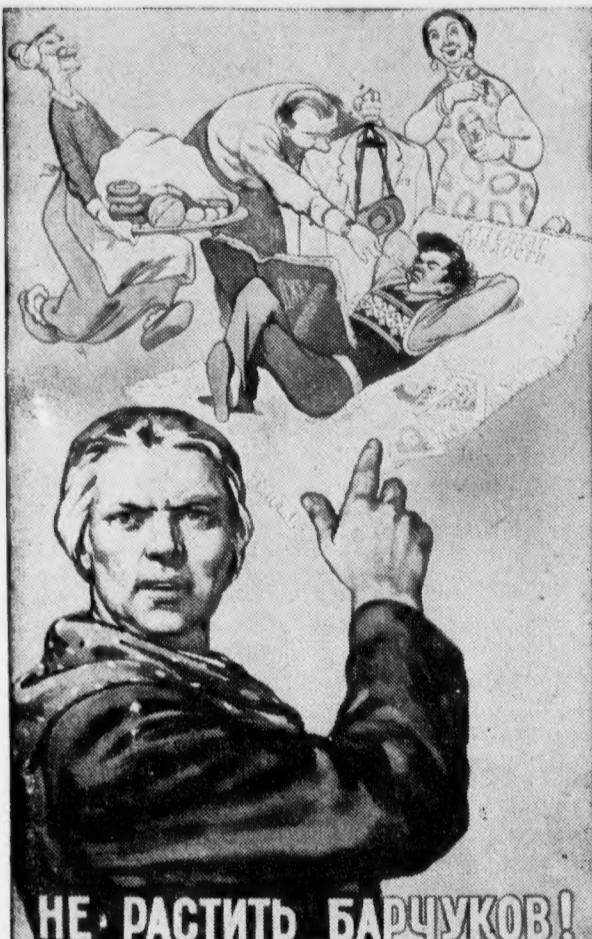

### GUIDE TEETH

The second or permanent teeth are very much dependent upon the first set. If the first are crooked or if one or more is lost too early, the space may be filled crookedly by the second tooth. At the age of three, a youngster may already have dental caries and teeth may be lost by this or other means, therefore it is advisable to take a child for a first visit to the dentist at that age, so that repairs may be made and teeth preserved for their natural length of life.

In Canada's West, oil and wheat now go together like bread and butter. The boom in oil is bringing Canada into the picture as a major producer of petroleum. This development of a two-crop economy has added jam to the bread and butter of many an individual. It has also improved the country's balance of payments through reducing the need for imported oil supplies and by stimulating investment in Canada.

# World Happenings In Pictures

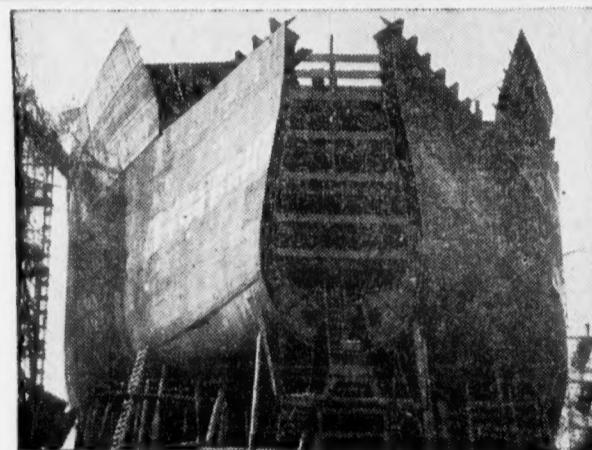

НЕ РАСТИТЬ БАРЧУКОВ!

**JUVENILE DELINQUENCY**—The problem of juvenile delinquency is an international one. In Russia a large scale poster "warfare" is reported. This placard from the USSR shows one of the juvenile delinquents reclining at ease on a couch which bears the words "Proof of Manhood", while he reads a "Jack the Ripper" book. His doting parents and relatives are seen catering to him. A large figure in the foreground points to the group and says "Don't Bring Your Children Up To Become Playboys".

**ALL THAI-ED UP IN TRAINING**—Fighting efficiency of the U.S. Marine Corps is passed along by an American leatherneck to a Thailand Marine at the Royal Thai Naval Base in Sattahip, Thailand. Training program is part of a bilateral Thai-U.S. military program called "Operation Teamwork". The program climaxed with an amphibious "invasion" of Had Chao Samran Beach by Marines of the two nations.

**FROM THE SUEZ CRISIS: SWIFT COMPLETION**—The 55,000-ton American oil tanker "Minneoma" nears completion at the shipyards in Dunkerque, France. Possible closure of the Suez Canal has speeded work at Dunkerque on super tankers of 100,000 tons—capable of sailing economically around the tip of Africa.

**THE SORBONNE**  
The world-famous Sorbonne in Paris was founded in 1253 by Robert de Sorbon, who established a house for poor theological students.

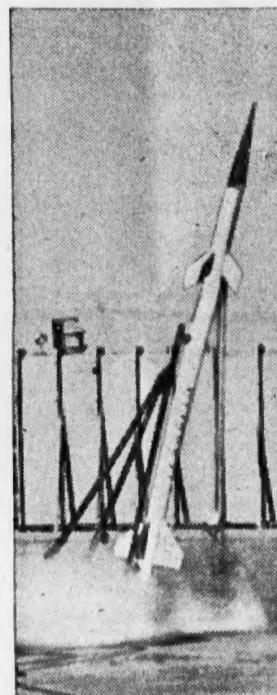

Use freshly-washed old powder puffs to clean silverware—one to apply the cleaner and one to do the polishing.

**STRAIGHT STRETCH**  
A railway in Australia boasts the longest straight-line route in the world. It runs through the Nullarbor plain for 300 miles.

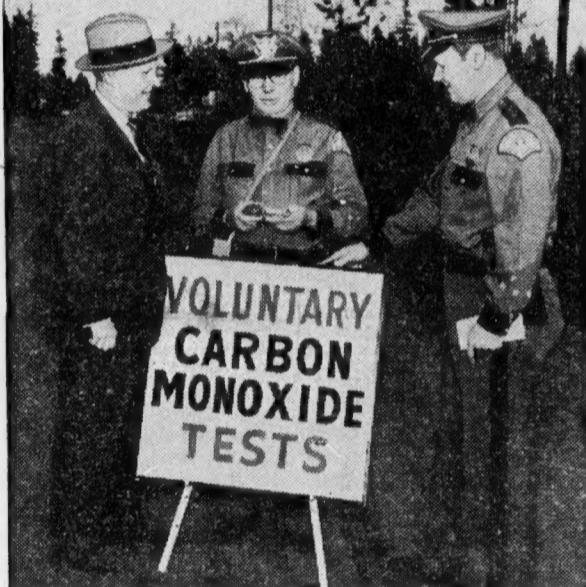

A handy place to keep favorite recipes not yet copied is in a heavy envelope pasted inside the cover of your cook book.

**VARIETY IN HAT STYLES** is the order of the day for Princess Margaret during her tour of East Africa. At present she is on a 10-day visit to Tanganyika. Here she wears six different afternoon models during her first two tour stops—to the island of Mauritius in the Indian Ocean and port of Mombasa in Kenya.

**AWAY ALL ROCKETS**—The "Terpin", newest missile to probe outer space, blasts off during a test run. Developed by the University of Maryland and Republic Aviation Corporation, the "Terp" is less than 15 feet tall, can be handled by three men, and is very economical—as rockets go. The new missile has already reached heights of 80 miles, speeds of 3,800 miles per hour.

**TESTING FOR THE "SILENT KILLER"**—Carbon monoxide—the "silent killer"—is the real cause of many traffic accidents. That's the theory the Washington State Patrol is trying to prove. Acting Patrol Chief Roy F. Carlson says, "It is a known fact that a small percentage of CO present in a vehicle for 35 minutes to one hour can slow a driver's reaction time, affect his vision, and give him a general feeling of drowsiness." The State Patrol, therefore, has inaugurated a voluntary testing campaign. A motorist merely stops at one of the patrol's testing posts. A patrolman holds a CO tester inside the car to take an air sample and then withdraws it to make the reading. Left, Gov. Arthur B. Langlie visits a testing station, manned by Lt. D. B. Rigg, center, and Chief Roy F. Carlson.

**HERE, FOR FALL, ARE FASHIONS** sized to fit 80 percent of women without expensive alterations. Chief difference between these clothes and "regular" sizes is the waistline, which is shorter here. Gray wool dress (left) is one-piece, has two-piece look achieved through loose bolero-type top edged with corded Venise lace. The shapely look appears (right) in an alabaster beige silk alpaca evening gown.

# The Sports Clinic

(An official department of the Canadian Amateur Sport and Physical Fitness Development Service)  
By Lloyd Percival

## Check your kick with chalk

Kicking is a fundamental foot-ball skill, especially in Canada, and a good kicker can usually be sure of a spot on the team. But to be considered a good kicker, you have to be able to get away from those high spirals, and this means perfect timing.

One of the things that gives you a good spiral is the way your foot contacts the ball. Your toe should be pointed just slightly inward and the seam of the ball should be just across the instep with the point just slightly to the left of the toe.

A good way to check your foot contact with the ball is to mark the underseam with chalk. When you kick a mark will be left on your boot. In this way, you can check just how your foot is meeting the ball, and correct any faults in position you notice from the chalk mark.

### Preventing "hock-y groin"

One area in which hockey players frequently suffer injuries is the groin. A few years ago, a serious groin injury almost ended the career of Maurice Richard, and it's rarely that a team goes through an entire season without at least one or two of the players suffering this type of injury.

Now is the time to start building up the groin and the area along the top of the inside of the legs. Added strength here will not only prevent injury but also will aid your speed and agility.

The exercise we recommend is "bag squeezing". Sit down and hold a large sawdust bag or pillow between your knees. With inward pressure of the legs try to squeeze it flat. Hold this pressure for five or six seconds, relax and then repeat. Do this 10 or 12 times.

Start now and build yourself up for the coming season. It's the smartest play you can make.

### Back up your blocker

If you're a football halfback, remember that your long runs are usually made possible by good blocking. Make sure you give your blockers the credit they deserve.

You can boost the morale of your blockers and inspire them to greater efforts if you tell them right after every good play what

## Funny and Otherwise

Two guys I know decided to go hunting one morning. "I've got the perfect set up," the first guy said. "I'll bring all the guns and such, and you bring all the provisions."

"Fine," said the second guy. And when they met the next morning the first guy was heavily laden with guns, shells, baskets and suchlike. The second guy was carrying a loaf of bread and four bottles of whisky.

The first guy blew his stack. "Look what happens when I leave the provisions to you!" he stormed. "A loaf of bread and four bottles of whisky! What are we going to do with all that bread?"

As two bank robbers aimed their guns at the bank employees, a third was busy cleaning out the tills and stuffing their contents into a gunny sack.

Just as they were about to leave, one of the clerks spoke up with a nervous tingle in his throat: "Please, Mr. Burglar, take the bank's books, too! Tomorrow we're expecting the bank examiners."

In a divorce court, a husband complained that his wife would not allow him to sleep. Afraid of thieves, she would awaken her husband if she heard the slightest noise, and make him get up to see if there were burglars in the house. This had been going on for five years.

"This difficulty can be dealt with easily," the judge said. "Just explain to your wife that thieves don't make noises; they operate quietly and don't disturb anybody."

"I've already done that, Judge," the husband said, "but it only made matters worse. Now she gets me up several times every night because she hears nothing."

## Quick Canadian Quiz

- How did the St. Lawrence River gain its name?
- What Canadian town was almost completely buried by a rock slide?
- In 1945 the federal civil service employed 138,702 persons. What is the present total?
- Income taxes were first collected in Canada in what year?
- Among the world's nations, where does Canada rank as an importer of foreign goods?

### ANSWERS TO QUICK QUIZ

5. In total imports Canada ranks third to the U.S. and U.K.; in imports of wholly manufactured goods Canada ranks first. 3. In 1955 federal government employees totalled 181,913. 1. On the day of the festival of Saint Lawrence explored Jacques Cartier found shelter from a storm in the river's gulf, gave the saint's name to the river. 4. In 1919 as a war tax measure. 2. The town of Frank, Alberta, in the Rocky Mountains.

(Material prepared by the editors of Quick Canadian Facts, the pocket annual of facts about Canada.)

## Ticklers

## By George

"Why, you're little Ronnie Slobhammer, who always carried a slingshot to school!"

## Love thy neighbor their order!

Members of a controversial religious sect here have been exchanging wives in order to obey a religious commandment. A member of the sect revealed in court that four families were exchanging wives according to the tenets of "original" church doctrine. The commandment they were obeying is: "Love thy neighbor".

### THAT'S NORMAL

After the physician checked the patient over, he asked, "Have you been living a normal life?"

"Yes, doctor."

"Well, you're going to have to cut it out for awhile."

## Probe use drugs for extra 'kick'

The Federal Health Department is investigating whether there have been any abuses in the use of tranquilizing drugs now sold over the counter in drugstores without prescription.

Dr. C. A. Morrell, head of the Health Department's food and drug division, said in an interview that if any abuses are reported, sales will be restricted to doctors' prescriptions.

## SALT USED IN PULP AND PAPER MILLS

Canada's pulp and paper mills used 99,524,000 pounds of salt valued at \$598,029 in 1954.

#### Safe hunting

(From The Times, Morden, Man.—Sept. 26, 1956)

This year's hunting season is just around the corner and sportsmen all over the country are oiling up their guns and making the usual preparations that always precede a good hunt.

Most of these preparations will consist of stocking up on shells and getting hunting equipment gathered up and put in order. But, like last year and every year since hunting first began, too many hunters will fail to recognize that their minds are the most important hunting equipment they have and that they, too, must be put in order if a thrilling hunt is not turned into a disastrous tragedy.

Again this year not only ducks, geese and deer will be shot, but human beings, too, perhaps someone right here in the Morden district, will be killed or frightfully wounded as a result of hunting accidents. In an automobile accident, a train wreck, or a plane crash, it is usually quite easy to absolve oneself of guilt or blame by laying the blame for the accident directly on some fault of the machine itself.

This provides an ideal escape for the guilty thoughts that prey on one's conscience after he is involved in an accident in which he was at fault. No such escape, however, can be found for the hunter who through carelessness, negligence, tomfoolery or uncontrolled excitement shoots another human being. For him there are no machines to be at fault; he cannot even blame the gun for if the gun was unsafe, he had no right to take it out and endanger the lives of others. And so the hunter whose carelessness shoots another must take full responsibility for the accident on his own shoulders. Imagine what a load that would be! No punishment devised by man can be so unrelenting and soul shattering as a guilty conscience forever reminding one that he ended or ruined the life of another, possibly a friend. It is, in fact, just a question whether it is not better to be the victim of a hunting accident rather than the man who did the shooting.

Hunting is one of the oldest and finest sports in existence. It can also be one of the safest and would be if hunters everywhere would sit down quietly before going out and fix definitely in their minds the rules of safety that must be adhered to if accidents are to be avoided.

#### Medical care for our aged

(From The Bulletin, Brooks, Alta.—August 2, 1956)

Increase in population, increase in birth rate, increase in average age expectancy have been marked trends in the last decade. With the latter, several conditions have been created which are becoming somewhat of a problem in many communities across the nation.

We refer to our "older population"—our elderly and senior citizens who are having an effect on hospital resources. Not those who are permanently in need of care, but those who require occasional nursing care and medical supervision and who are confined in hospitals. Care for such of our senior citizens has been tackled by Lethbridge, which recently opened a Rehabilitation Centre, and by Stettler which has similar accommodation for the aged in connection with its hospital. Vulcan is looking into the building of a hospital addition to house its old folk who are not ill but who require occasional attention and supervision.

This matter also has been referred to the board of Brooks Municipal Hospital District and is presently receiving attention and examination.

The matter of a "rehabilitation centre" for older citizens to be operated in conjunction with present hospitals certainly has merit. Many of our older people who are ill and living with married sons and daughters create a problem both for themselves and their relatives. A regular hospital confinement is not the answer because for the most part they do not require active care. A place where they can be treated as convalescent patients with certain privileges such as a common dining room and recreation rooms, with certain small chores to do such as making their own beds and cleaning the room—that is more like the answer. Rather than be regular hospital patients these older people could be partly self-sufficient and probably would welcome the chance to be so—and at the same time free badly needed beds in crowded hospital accommodation.

With federal grants to assist in building such a home and with provincial grants to help in annual maintenance, a place for our partly-ill senior citizens certainly deserves active consideration by any hospital seeking to ease its overcrowded facilities. It should also receive the attention of all people who wish to ease the final years of certain of our senior and elder citizens.

#### Milk not a popular drink in B.C.

(From The Canadian, Camrose, Alta.—Aug. 8, 1956)

Reports coming through investigation carried out by the dairy industry indicate that the people in B.C. drink less milk than in any other province in Canada, excepting Newfoundland. On the other hand, the B.C. people are among the highest consumers of alcoholic beverages in all of Canada . . . also, milk is very high priced in that province. We found the prices in Victoria to be six cents a quart higher than in Camrose.

#### Sickness actually beneficial to race

An "apology of sickness" was made by Dr. Antonio Lecours before members of the Ottawa and Hull Richelieu Club at their luncheon.

Dr. Lecours who is an Ottawa surgeon and University professor, admitted that "sickness has a bad reputation but on acquaintance you will find that it is not quite as bad as it is painted."

"After all," he said, "sickness is but a struggle towards good health. And this struggle, like all others, may be a very beneficial experience according to your attitudes."

Sickness may be a warning that some bodily functions have been overstrained. It may be a wonderful opportunity for intellectual and moral development, he explained.

"I will go so far as to say that sickness has been, and is, the greatest instrument for the advancement of the human race," he said.

"Why should I speak to you of sickness when there is no such thing," concluded the speaker. There are only sick people. This is why socialized medicine, altogether too prone to forget that, is doomed to failure. Medicine was born in the temple; it is a ministry that must be maintained."

#### Helpful Hints

The correct type of hanger is important in keeping garments looking their best. The hanger should have the same slope as the shoulders and should be the same width as that across the shoulders of the garment.

For machine drying blankets first pre-heat six or seven large bath towels, then add blanket. Towels help absorb moisture and cushion the tumble action of the blanket. Minimum agitation or friction is the most important factor in preventing felting shrinkage.

A little household ammonia in soapsuds when you wash the bathroom floor tiles will give better results in whiter tiles. A stiff scrubbing brush will erase stubborn spots. Don't use too much water on the floor; the suds, made thick with a minimum of water, will do the work. Let the washed floor dry thoroughly, wiping it with a wrung-out cloth or mop, and let dry—preferably with the window open—before replacing the furnishings.

The liquid in which vegetables are canned or cooked is rich in minerals drawn from the vegetable. This should never be thrown away, but should be salvaged for enrichment of soups, gravies or vegetable juice.

Homemade jam will not get "sugary" and will keep better if a tablespoon of glycerine is added to every pound of fruit used.

Layers of blue ice are scattered through icebergs.

**BUMBER-SHOOTING STARS**—Clouds may hide the skies, but stars will still twinkle for the user of this umbrella. A rainy-day brightener from West Berlin, Germany, the umbrella has tiny bulbs that light under each star when the user presses a switch. Power is supplied by a battery in the handle.

#### Masonry paint on walls helps keep basement dry

Fall is "fix-up" time and the inundation of basements in many areas has brought a new surge of activity beneath the ground level. Hundreds of basements are being waterproofed and converted into "do it yourself" workshops, recreation centers, utility rooms, and laundries.

Many fixer-uppers include teenagers who are looking forward to the big winter frolics. There are plans for hobby rooms and student "museums" in many homes.

With masonry paint now available in a wide variety of colors, homeowners are finding that attractive rooms for many purposes are possible in their basements.

Ingenious youngsters in a Michigan community have completed what they call their "marine room" by painting a rippling blue-and-white water pattern with brilliant colored fishes on the walls. They have acquired an old upright piano which they have painted to match the walls and their mother has put up sea-blue drapes with a ship design.

On the floor they have painted a shuffleboard pattern. This winter the "marine room" will be the fun center for a lot of youngsters in the neighborhood.

While they are "doing over" the basement, some homeowners will give their walls a flagstone effect with the masonry paint or paint a shuffleboard pattern in the patio.

Martin Kennedy has some suggestions for waterproofing basements in attractive colors.

He recommends that a first step before using masonry paint is to thoroughly clean the walls, giving them a "brisk going over" with a wire brush and then washing them down. He said that any efflorescence (that's a high sounding word for salts in the masonry) can

be removed with etching acid and then neutralized with rinse water. If there's whitewash or calcimine on the walls this must be removed. A good scrubbing with hot water should do the job.

Water-soluble, resin-based paints can be removed by a 20 percent solution of muriatic acid and rinse water, while oil-based paints require one pound of lye to a gallon of water. In both cases, Mr. Kennedy advised using rubber gloves to protect the hands from strong solutions.

A better bond between the wall and the masonry paint is obtained if all previous paint is first removed.

The next step—lightly dampen the walls (after they have dried out from the cleaning) before the application of paint. He emphasized that the masonry must not be soaked, merely wetted down.

It is recommended that the paint be applied with a scrubbing brush, being careful to fill all depressions and small cracks. Scrub the paint into the corner formed by the wall and the floor, coating at least an inch of the floor along the wall.

—Christian Science Monitor.

#### WATER VAPOR

A whale doesn't actually spout water. When coming to the surface after a dive, the whale exhales and the column of warm air condenses to water vapor upon contact with the cooler air.

The reconstruction of No. 3 highway on a new location between Kinistino and the Hagen corner nine miles straight east of St. Louis has been completed, and graveling operations will begin shortly, according to L. T. Holmes, deputy minister of highways.

In addition to shortening the distance between Kinistino and St. Louis by eight miles, the new road crosses only one railway track as compared to four on the old road.

The road was graded on a 150-foot right-of-way, which means that pole lines and fences put up will be set back an extra 25 feet

on either side. The normal right-of-way set aside for this class of road is 100 feet. A considerable saving will result in future when the road is widened in preparation for hard-surfacing.

Seven possible routes for the new section of road were studied before construction began, the main ones being a proposed direct road from Kinistino west to Hagen corner, and the one decided on. Traffic counts were taken and an origin and destination survey was made to gather information on the volume and different types of traffic which use No. 3 highway.

The route considered directly west from Kinistino to Hagen corner would have shortened the new road just completed by only 1.8 miles. This would have resulted in a slight saving to through traffic, which counts revealed was not heavy, but would have made it less convenient for residents of Weldon, Brancepeth and Birch Hills and surrounding areas. In addition, main access roads to these centres would also have been required had the southern route been followed.

LOSE A MINUTE—SAVE A LIFE

## Mink ranching in Saskatchewan's northwest

Halvor Ausland is a big man (six feet, two inches; 220 pounds), who likes to do things in a big way. He came to the north country 37 years ago with nothing to his name but a rifle, canoe and a few traps. Today, he's the biggest mink rancher in northern Saskatchewan.

His ranch is on the Macbeth Channel, about midway between Buffalo Narrows and Ille à la Crosse. It's an elaborate setup—a dozen buildings and several block-long rows of mink pens, representing an investment Ausland says is in the neighborhood of \$150,000.

Ausland is 54; married, with a family of four girls and two boys, one of whom is recently set up in the mink ranching business.

He has made mink ranching—which he started in the late 'thirties—science, developing several new and highly popular "mutations", and has done more than any other single person for the industry in this region.

He says he got where he is through hard work, constant study and research. He drives himself and his help hard and has no time for slackers.

The hardest work comes during the morning and evening feedings. The rest of the time, there are pens to build and mend, fish to catch, and machines and equipment to maintain. It's a busy life.

Hard work and shrewd planning has brought Ausland big returns in recent years. He doesn't disclose what he makes annually, but some idea of this might be gained from the fact that his income tax tab last year was \$7,000.

Ausland keeps about 2,000 mink, with some 400 of these breeder females. This November, he will pelt about 1,400 of the exquisitely-furred beasts, receiving as much as \$400 apiece for rare mutations.

He claims mink ranchers must go into mutations (creating different color shades through selective breeding) to be successful, nowadays. Among mutations he has successfully established are sapphires, pearl topaz and buffs. The pelt of a "standard" mink is a brown-black color.

"We're always striving to develop better mink," says Ausland, speaking for himself and fellow ranchers. It takes an average of four years of careful breeding to develop a new mutation. Many of his mink are sold live, as breeders, to other ranchers in the region and, for that matter, to ranchers all over North America.

He has lost surprisingly few mink over the years and maintains that the biggest losses suffered by ranchers are usually due to carelessness. He says that with proper precautions, mortality from diseases and other causes can be practically eliminated.

Feeding 2,000 mink daily is quite a job, but Ausland has mechanized and streamlined the process to a point where he and five helpers can do it in two hours. To ground fish, the principal ingredi-

### Strange fish identified

A strange fish found some time ago in the Souris river near the Midale Dam has proven to be the Tadpole Madtom, a fish never before found in Saskatchewan. Fred Bard, director of the Saskatchewan Museum of Natural History, said.

When found it was believed by museum authorities to be the black or the brown bullhead, and was forwarded to the University of Saskatchewan for positive identification by F. M. Atton, a member of the fisheries laboratory.

The difference between the Bullhead and the Tadpole Madtom is so minute that only fish experts would be able to tell them apart.

Like the Bullhead, the fish has a heavy head, no scales, whiskers or tentacles on the lower jaw, a wide mouth, many sharp teeth and strong jaws, and is also a member of the catfish family.

It is five inches long and has a dorsal fin and two pectoral fins with sharp needle-like spines. The main difference between it and the Bullhead is that a tiny fin on the back is joined to the tailfin.

The fish was caught in the Souris river in July by J. K. Fredericksen of Weyburn.

Dr. Robert W. Nero, assistant director of the museum, suggests that anyone sending fish specimens to the museum should send them in a jar preserved with alcohol or some other preservative.

COURTESY PAYS OFF

### Strictly Fresh

A Pittsburgh street cleaner was fired recently. He couldn't keep his mind in the gutter.

No fuel like old fuel. A driver pulled his truck up to a home in Toronto, Canada, and proceeded to pour 200 gallons of oil into the

basement before the lady of the house could tell him she had no oil tank, having just converted to gas heating.

Ausland thinks there's a big future for mink ranching in the Buffalo region. The remote environment, combined with the abundance and easy availability of rough fish (he uses more than 100,000 pounds yearly), are among the most desirable factors here.

Actually, the mink ranching industry has been growing by leaps and bounds in the Buffalo region, with 51 ranches operating now, compared to only eight, in 1945.

Autumn leaves are about the only thing Dad can rake in without being taxed—except perhaps in strength.

Definition of a promise: that which is more blessed to give than receive. 3217

Ordinary goldfish live about 50 years while fancy ones, like the fringe-tail, about seven years.

### Cabbage treasure

The common cabbage is not only a valuable food but it can be used in many ways, cooked or raw. The dark outer green leaves contain more pro-vitamin A value. Cabbage can be used raw in salads, cooked as a separate vegetable or added to stews and soups.

The first 500-mile Indianapolis speedway race was held in 1911.

### "Athlete's foot"

Germs of the disease known as "athlete's foot" can be picked up from the floors of indoor swimming pools or gymnasium where people suffering from the disease have walked barefoot. In such places, slippers should always be worn when travelling to and from the pool or across the gym floor.

LANG—OVERMAN

Miss Lyla Amy Overman, daughter of Mr. and Mrs. Reg Overman of Cut-Knife, Sask., became the bride of Mr. Kenneth Lang, son of Mr. and Mrs. Emil Lang of Beiseker in a recent ceremony at the Rosebud Seventh-day Adventist Church, Elder Habernicht of Calgary officiating.

Given in marriage by her father, the bride wore a full-length strapless gown of white bouffant lace over taffeta, trimmed with sequins and seed pearls on the skirt and bodice, modified by a jacket with peter pan collar with pearl trim and lily-point sleeves. Her fingertip veil was held in place by a shell-sha-

ped headdress, trimmed with pearls and sequins, and she carried a bouquet of red roses with Sweetheart drop roses and fern.

The maid of honor, Miss Margaret Henrikson of Cut-Knife wore a full length gown of blue lace over taffeta and she carried a bouquet of pink carnations. Miss May Overman of Saskatoon, sister of the bride, was gowned in pink lace over taffeta and carried a bouquet of blue carnations. Miss Joan Lang, cousin of the groom, wore a full length gown of pale green lace over taffeta and carried a bouquet of yellow carnations. The three attendants wore headdresses matching their dresses.

The best man was Mr. Gene Lang, brother of the groom. Ushers were Mr. Mervin Goodman and Mr. Allan Lang, cousin of the groom, both of Calgary. Mrs. G. Triebwasser and Mrs. Sam Leiske sang a duet, and Leslie Berreth of Beiseker played "Melody of Love" and "The

Wedding March".

The wedding reception was held at the Beiseker Hall where Mr. Eric Overman, uncle of the bride, proposed the bridal toast.

Mr. and Mrs. Lang will make their home at 2632-3rd Ave. N.W., Calgary.

TONY SCHMALTZ  
VERA SCHWARZENBERGER

Before an altar decorated with yellow Baby Mums, marriage vows were exchanged between Vera Schwarzenberger and Tony Schmaltz on Oct. 24th at St. Mary's Church, Beiseker. Rev. Father Tennent officiated with Rev. Father McGreevy of Midnapore in the Sanctuary.

Given in marriage by her father, the bride looked charming in a floor-length gown of white nylon taffeta over crinoline. The low neckline was trimmed with flowers of the same material, centred with rhinestones. The same flower arrangement also trimmed the skirt. Her finger-tip veil trimmed with lace was fastened to a coronet style headdress and she car-

ried a bouquet of red roses and white carnations.

She was attended by her sister Jeanette as maid of honor dressed in Nile green nylon net over taffeta, in bolero style with full skirt and wearing a bandeau of yellow feathers. Her flowers were matching yellow carnations and bronze mums.

Her bridesmaid was Mrs. Ernie Corry of Calgary, sister of the groom, and she was gowned in pink lace and taffeta bolero style, with a matching headdress of pink feathers, and she carried a spray of pink and white flowers.

The best men were Ernie Corry of Calgary and Ray Schwarzenberger. Simon Schwengler and Albert Hagel acted as ushers.

A reception was held at noon in the Memorial Hall for about 120 guests. Mayor L. L. Schmaltz acted as Toastmaster. The toast to the bride was proposed by F. A. Meidinger. Other speakers were Rev. Fathers Tennent and McGreevy, F. J. Sch-

maltz of Sparwood, B.C. and Victor Hagel of Schuler. Many lovely gifts were received by the young couple.

After a honeymoon spent at Great Falls and other points, they will reside in Beiseker.

Smartness is combined with utility in 1957 Chevrolet station wagons, as shown in this Bel Air six-passenger model. As in other Bel Air models, the station wagon gains styling distinction with the aluminum insert for the flared rear fenders.

Featuring horizontal-sweep styling, the 1957 Chevrolet looks even longer than its 200 inches—two-and-one-half inches more than last year. All bodies are lower, too, and further additions have been made to windshield area, the whole adding up to striking eye-appeal. Among the many mechanical advancements is revolutionary fuel-injection as an available option. Shown above is the Bel Air sport

Completely new styling from hooded headlamps to taillights features Oldsmobile for 1957, with the most sweeping model change in 20 years, as presented in this Super "88" Holiday coupe. "Sky-line" heading down the roof extends into the rear deck and sets off the twin-strutted rear windows with three separate glass areas. Distinguishing the new front end are the new "hi-lo" bumper, twin front fender rocket emblems and parking lights adapted from the experimental Golden Rocket. Inside there is a new strut-mounted instrument panel and a wide variety of new upholstery fabrics and colors. Mechanically, there is a new 277 h.p. "Rocket" engine, improved front and rear suspension, 14-inch wheels and a more efficient dual-range heater.
